

WIF 2026 Center Stage

National Investment Presentations and Pitches

The Center Stage at the World Investment Forum 2026 will provide participating delegations with an opportunity to showcase their countries, investment opportunities and priority projects directly to the Forum's international audience.

Located in the central networking area of the Sheraton Grand Doha Resort & Convention Hotel, the Center Stage is designed as an open and dynamic presentation space that benefits from the continuous flow of WIF participants throughout the venue.

Format

Interested delegations will be able to deliver a short national presentation or investment pitch. Approximately 10 minutes per participating country are envisaged, subject to confirmation based on the overall level of interest and availability of time slots.

The Center Stage will be equipped with a screen for slide presentations and video content.

Delegations are encouraged to mobilize relevant participants through their own networks while also benefiting from the visibility and participant traffic generated by the Forum.

General Networking at WIF

The Center Stage is intended not only as a presentation platform but also as a gateway to further engagement. Given its location within the main networking area, delegations may continue discussions with interested participants immediately following their presentation, including through informal Q&A or standing networking nearby.

Delegations will also be able to book dedicated bilateral meeting rooms, subject to availability, for private discussions with investors, partners and other WIF participants. This will allow for conversations in a more focused setting. In addition, the WIF conference app will provide participants with an additional tool to connect with one another and arrange meetings.

Expressions of interest

Delegations interested in using the Center Stage are invited to contact Natalia Guerra at natalia.guerra@unctad.org. Specific presentation durations and time slots will be confirmed once the overall level of interest has been assessed.
